## **Helpful Tips**

1. Review the order form before beginning. Make sure you understand how to fill the form out properly. Notice your customer can choose from the following items – t-shirts, ladies t-shirts, sweatshirts, canvas tote bags, and shatter products. With the shirts, they also have a choice as to which side the design is printed on, type of shirt and color.
2. Review the items being sold in the brochure. There are over 200 different designs!
3. It may be a good idea to list names of potential customers before getting started, such as friends, relatives, fire department, etc. Be safe – RTshirts.com encourages children to sell to friends and family, not door to door.
4. Be sure to print clearly on the order form and make sure you include the customer phone numbers. RTshirts.com will contact the customers directly if there is a problem on the order form.
5. Collect amount due at the time of sale.
6. Be sure to make checks payable to YOUR organization and NOT to RTshirts.com.
7. While a customer is deciding on their order, ask them about friends and relative's birthdays and remind them of upcoming holidays. RTshirts.com products make great gifts.

**Good luck and thanks for your help!**
